RESEARCH OPPORTUNITY FOR NEW SESSION

Activity

ABOUT US

The study of interaction of humans and systems dissects tasks and considers each component in relation to a number of factors and interactions among themindividual, environmental, and social factors are very important. As an advanced research lab, we investigate scientific issues related to (but not limited to) Automotive Human Factors, Community Systems, Human -Computer Interaction, Human Performance, Healthcare Human Factors, Smart Environment, Sociotechnical System, System Design, among others. We use quantitative as well as qualitative studies for an in-depth understanding of the realworld research problems.

PHD PROGRAM IN PSYCHOLOGY

Human Factors & Applied Cognition

Human-System Interaction, Automotive UX, HCI, User Experience, Contracted/ Protracted Attention, Mental Model, Human Errors, Safety, Performance, Visuospatial Processing, Community System, Behavioral Insights, Empirical Aesthetics etc.

CERTIFIED

The Degree

Earning a doctoral degree opens the door to be among the leaders in the field. The training is rigorous and emphasizes on building core competencies.

Professional Practice

We encourage lab members to work towards training and certification in specific domains of expertise. We emphasize on active contribution to innovation, development of relevant knowledge, and practices.
